5. Remove the cabinet glass and set aside. Using figure 1 as a guide, measure the 3/4" location from the post and 1/2" from the wood rails and center punch. Using a #42 drill (.093), drill a 1/4" deep pilot hole on the left and right sides. Do not drill thru the playboard. Remove the wood chips.

Insert the screws and washers into the plastic posts and tighten securely and perpendicular to the playboard. Add the rubber rings and replace the cabinet glass to the game.
