Bump & Jump

IMPORTANT NOTE

DO NOT plug in your new game yet. Before you do anything to your game, we recommend that you read SECTIONS I and II of this manual completely. It will not take more than a few minutes and it may be very helpful.

I. Introduction

Your NEW GAME is for one or two players. There are two models: the "UPRIGHT" and "COCKTAIL TABLE". When the two player mode is selected on the Upright model, the players take turns at the controls to guide their player through the game course. If you have purchased the Cocktail Table model of this game, the rules of play are the same. The only **difference** is that in the two player mode of the Cocktail Table game, the picture flips to face you when it's your turn.

When playing this game, you are the controlling force. It is up to you to direct your player successfully through the game course. Your job is to give guidance and provide offensive and defensive strategy to enable your player to overcome all obstacles.

Your opponents will use every trick in the book, and may even invent a few new ones, to overcome your various strategies and eliminate your player(s). You really have to keep a close eye on them at all times.

As your skill level increases, you will notice that your opponents' offensive abilities greatly increase. Any advantages you once had at the beginning of the game will gradually be reduced until they are completely gone.

Bonus players may or may not be awarded depending on the options the game owner has selected. The point values of all items are listed in Figure 1-1.

Major Features

Your game is equipped with a detailed self-diagnostic package.

It also has been provided with a new improved Power Chassis designed to help reduce electrical interference with other equipment.

Game Objective

The object of the game is to **HAVE FUN** and survive as long as possible while constantly improving your skills and advancing to the highest rack that you can. As you do this, each following rack of the game will have more and greater obstacles for you to overcome, and will in general be harder to complete.

COMPETITORS VEHICLE POINT VALUES

1. FIRST GROUP OF COMPETITORS VEHICLES	200 POINTS EACH
2. SECOND GROUP OF COMPETITORS VEHICLES	300 POINTS EACH
3. THIRD GROUP OF COMPETITORS VEHICLES	500 POINTS EACH

SPECIAL BONUS AWARDED

50,000 POINTS

FOR EACH RACK FINISHED **WITHOUT CAUSING ANY COMPETITORS TO CRASH**

1,000 POINTS

FOR LANDING ON AN ISLAND WHILE MAKING A WATER JUMP

Figure 1-1

II. Game Operation

BUMP & JUMP is a one or a two player game with a color T.V. monitor. The game gives a display which has all the parts shown below.

The game has five possible modes of operation: ATTRACT, READY-TO-PLAY, PLAY, HIGH SCORE/INITIAL, and SELF-TEST.

Identification of "On-Screen" Graphics During Game Play

SELF-TEST MODE

The Self-Test mode is a special mode for checking the game switches and computer functions. It is the easiest and best way to check for proper operation of the entire game.

NOTE: Putting the game into Self-Test will cause it to **erase** any CREDITS it has on it from its memory.

You may begin a Self-Test at any time after the power to the game is on by sliding the TOP Self-Test switch to the "ON" position and then turning the game "OFF" and back "ON" again. (The "SELF-TEST" Switch(es) are **ONLY READ** by the game's computer for instructions **WHEN THE GAME IS POWERED UP.**) Now that the game is in the Self-Test mode, it will react as follows:

1. First, you will hear a tone for about 1/2 second.
2. Immediately following this, a rightside up test display is shown on the monitor screen. Pushing the CREDIT BUTTON after each display is completed will cause the game to step through each of its Self-Tests. The game will remain in this Self-

Test mode until you set the TOP Self-Test switch back to the "OFF" position and turn the game "OFF" and back "ON" again. These test displays are shown on the following page.

3. If a bad ROM or RAM chip is found by the game's internal check system during the Self-Test, the game indicates this to you by showing the P.C. Board location code of the bad chip(s) in place of the letters "OK".
4. To check your game function switches and buttons (coin counter switches, JUMP Button, 1 PLAYER and 2 PLAYER buttons, etc.): activate each one while the game is in the "SW TEST" section of the complete Self-Test mode. You should see a different square filled with light for each activation. If you do not see it, the switch/button is either not working, miswired, or disconnected. Check it out thoroughly.

NOTE: Activating either the CREDIT BUTTON or COIN COUNTER SWITCH will cause the game to advance to the next test mode category.

**SELF-TEST DISPLAY
AND BOARD LOCATION COORDINATES**

RAM TEST OK or (a number and a letter i.e. 1L, 3H, etc.)

ROM TEST OK or (a number and a letter i.e. 4D, 5B, etc.)

SOUND	PSG1	PSG2	END
	CHECK 01/02/03	04/05/06/07/08/09/10/11/12/13/14/15/16/17/18/19/20/21	

SW TEST — (ACTIVATE ALL OF GAME'S INPUT SWITCHES — IF GOOD THEY WILL LIGHT A SQUARE)

TILT TEST — (ACTIVATE TILT SWITCH — IF GOOD IT WILL LIGHT THE SQUARE)

DIP TEST **NO 1** **NO 2** (INDICATES WHICH OPTION SWITCHES ARE TURNED "ON"
 00001011 00000000 AND WHICH ARE TURNED "OFF" — 1 = "ON" & 0 = "OFF".)

↙ THIS NUMBER **ALWAYS APPEARS** AS 1.

MAPING OK or (a number and a letter i.e. 6J, 7F, etc.)

MIX TEST (if error, one or more characters will be out of sync)

P2 2N 2	

CROSS HATCH PATTERN DISPLAYED (there is a dot in the center of each square)

5. VIDEO P.C. BOARD TEST **ONLY**:

To check "VIDEO", slide the TOP and the BOTTOM Self-Test switches to the "ON" position and then turn the game "OFF" and back "ON" again. (The "SELF-TEST" Switch(es) are **ONLY READ** by the game's computer for instructions **WHEN THE GAME IS POWERED UP.**) Now that the game is in the Self-Test mode, it will react as follows:

It will give the same screen display it did when the video was checked as part of the complete Self-Test procedure.

Pushing the CREDIT BUTTON after each display is completed will cause the game to step through each of its VIDEO P.C. BOARD Self-Tests. The game will remain in this Self-Test mode until you

set the TOP and the BOTTOM Self-Test switches back to the "OFF" position and then turn the game "OFF" and back "ON" again. These test displays are shown below.

6. If you wish to produce **ONLY** a CROSS HATCH test pattern on the monitor screen for further use, just leave the game at that portion of either the complete Self-Test or the partial Self-Test mode until you are through making whatever adjustments you needed it for.
7. When finished with the Self-Test mode, make sure **BOTH** Self-Test slide switches are in the "OFF" position.
8. Normal game functions will then return to the monitor screen.

RAM TEST OK or (a number and a letter i.e. 1L, 3H, etc.) [DOES NOT REPEAT]

MAPING OK or (incorrect address bit)

ATTRACT MODE

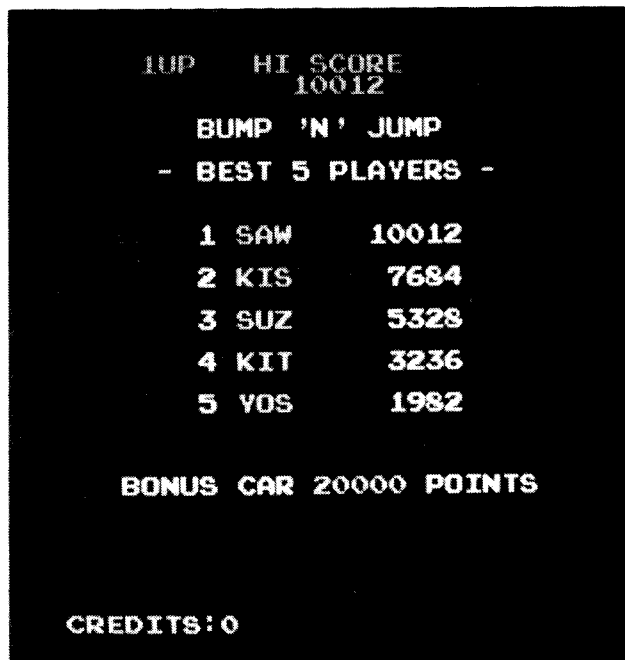

1. The Attract mode starts:

- Just after power has been turned on to the game. (Self-Test switch(es) in the "OFF" position.)
- After a Self-Test has been completed. (Performing a Self-Test sets the credits in the game's memory to zero "0".)

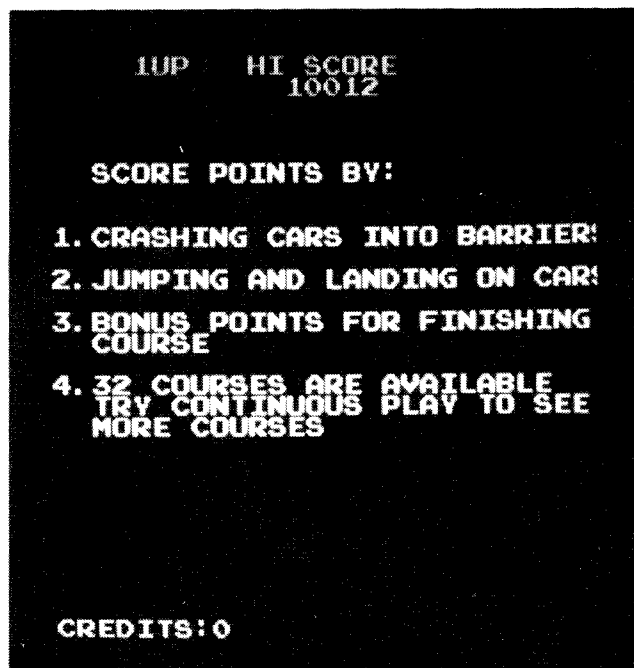

- After a play has been finished, the score was not high enough to put the game into the High Score/Initial mode, and there are no more credits left in the game's memory.
- After the High Score/Initial mode when there are no more credits left in its memory.
- In the Attract mode, the game will give the following displays **centered** on the monitor screen:

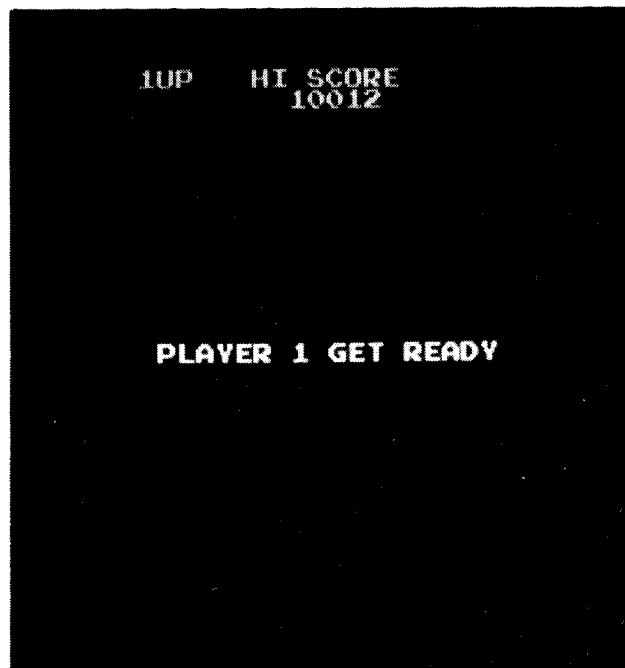

Attract Mode Display #1

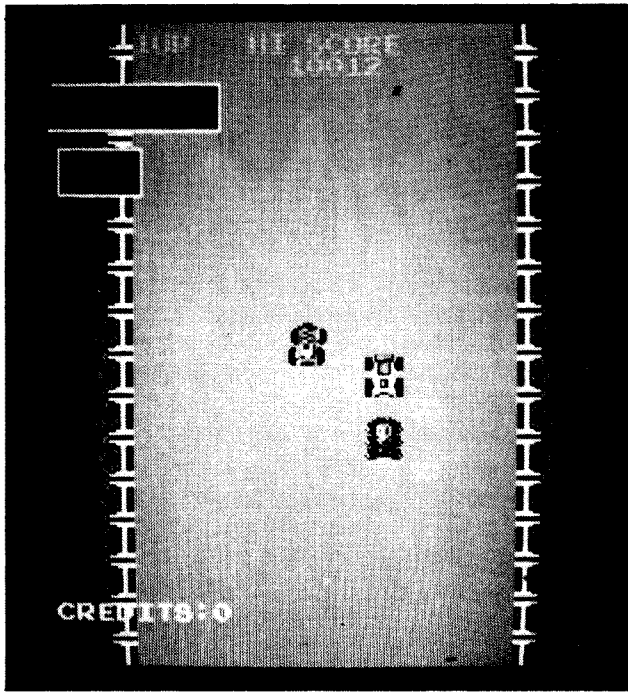

Attract Mode Display #3

Attract Mode Display #2

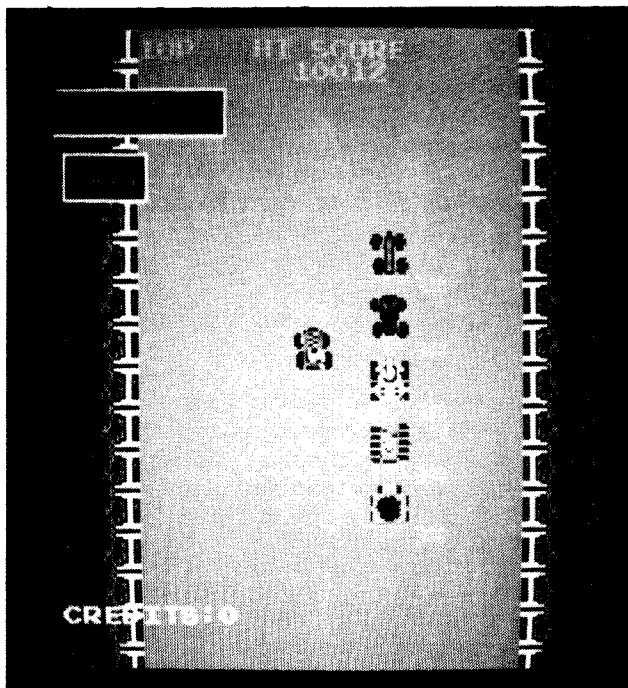

Attract Mode Display #4

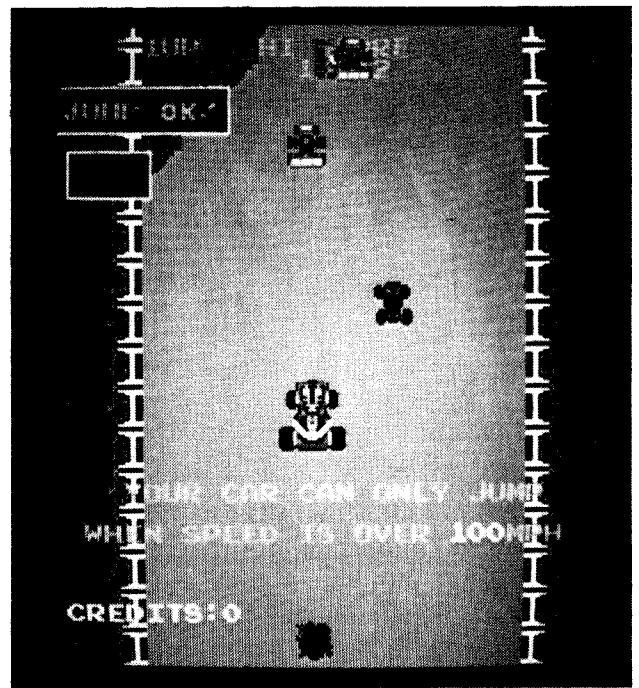

Attract Mode Display #5

Attract Mode Display #7

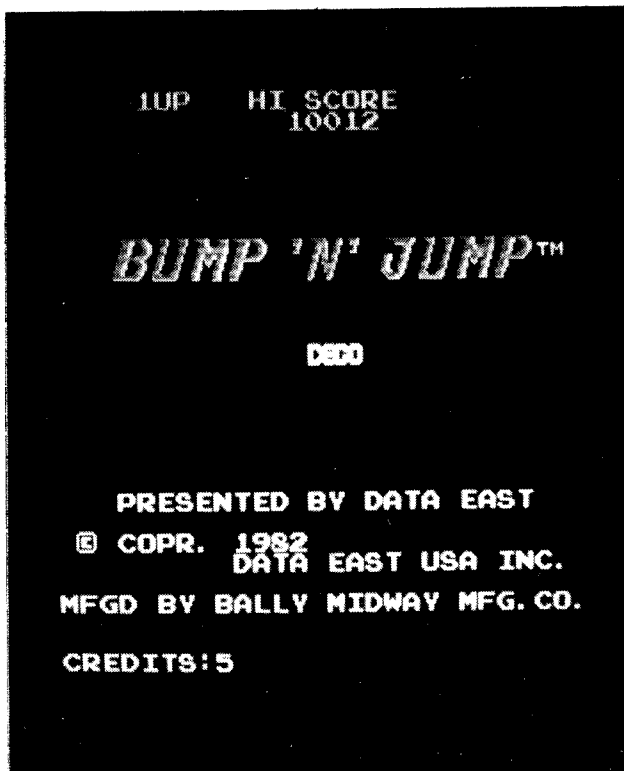

Attract Mode Display #6

Attract Mode Display #8

□ No matter where the game is in the Attract mode sequence, it will immediately show the credits you just paid for at the lower left hand corner of the monitor screen. This is the **ONLY** change in the Attract mode sequence to indicate that you are

now in the Ready-To-Play mode sequence. These credits will remain at the bottom of these displays in this sequence until the "1 PLAYER" or the "2 PLAYER" start button is pushed.

Ready-To-Play Mode Display

READY-TO-PLAY MODE

1. The Ready-To-Play mode starts when enough coins have been accepted for a 1 or a 2 player game.
2. The Ready-To-Play mode ends when either the "1 PLAYER" or the "2 PLAYER" push button is pressed.
3. In the Ready-To-Play mode, the game will give the above modified displays **centered** on the monitor screen.
4. If no START button is pressed, the displays will remain modified indefinitely as shown above.

PLAY MODE

1. The Play mode begins when either the "1 PLAYER" or the "2 PLAYER" start button is pressed. "PLAYER 1 GAME START" is displayed **centered** on the screen.
2. The Play mode ends when all of your CARS have been eliminated. When this happens, you will go to the High Score/Initial mode if your score was high enough — or — "PLAYER 1 GAME OVER" is written across the center of the monitor screen.

3. When playing this game, you are the CAR's controlling force. It is up to you to direct it through the driving course to reach the gas pump at its end. Your job is to give it guidance while going through the course, keep it from being smashed into the sides of the road by its competitors, and to smash as many of those competitors into the same obstacles and edges of the course that they were trying to smash it into.
4. These competitors are very sneaky and, if given half a chance, will try to corner your CAR in such a way as to force it off the road or keep it from gaining enough speed to jump over the water and other obstacles.
5. The CAR's competitors have no real defense mechanisms of any kind. But they **CANNOT** be **PERMANENTLY** eliminated either. As soon as your CAR puts one competitor out of commission, another appears on the road at the top or bottom edge of the screen.
6. As your skill level increases, the number and types of competitors coming at your CAR at any one time and the speed with which they move, is gradually increased; plus, their pursuit patterns become more and more devious while their overall accuracy is highly improved.
7. Bonus CARs are awarded to you periodically throughout the game as you reach or pass certain preselected point values.
8. When you complete the first course (called a Rack), your CAR pulls up to the pump to take on fuel, you are given a congratulatory message by the game, are told what your bonus is, the number of the next Rack is displayed in the lower left corner of the screen, your CAR appears at the bottom center of the road, and then the next course begins.
9. When the competitors happen to eliminate one of your CARS, assuming you have at least one remaining in reserve, the next CAR appears at the bottom center of the road and play begins again.
10. When the competitors eliminate your **LAST** CAR, **SEVERAL DIFFERENT THINGS CAN HAPPEN**.
 If your score was one of the TOP 20, the game will go directly to the High Score/Initial mode presentation. When you are finished entering your initials, the words "PLAYER 1 GAME OVER" are displayed **centered** on the monitor screen.
 If your score is not high enough to cause the game to go into the High Score/Initial mode, the words "PLAYER 1 GAME OVER" are displayed **centered** on the monitor screen and it will then either go to the Attract mode (if there are no more credits left in its memory) or into the Ready-To-Play mode (if there are still credits left in its memory).

HIGH SCORE/INITIAL MODE

In the High Score/Initial mode the game gives a display which looks like the following:

High Score Initial Mode Display

When in the High Score/Initial mode, all the letters of the alphabet are displayed in a field above the rankings list.

By moving the controller stick left, right, up, or down, you can position the Cursor at your initials one at a time. When you have it positioned properly for one of your initials, push the Jump Button and the Cursor will take that initial down and put it in front of your score. Continue the procedure for your remaining initials.

If you do not wish to put your initials opposite your score, just press the Jump Button three times. Three "A"'s will be positioned opposite your score.

After the High Score/Initial mode, the game will display "PLAYER ____ GAME OVER" and then go to either the Attract mode (if there are no more credits left in its memory) or into the Ready-To-Play mode (if there are still credits left in its memory).

Most of the above holds true in the "2 PLAYER" mode also. But there are a few minor differences.

TWO PLAYER OPERATION

The Upright and Cocktail Table models both have two player operation.

In the Two Player mode, the rules of play are the same as in the single player mode. There are some additional rules, however.

1. In the Upright models, the players must take turns at the controls.
2. In the Cocktail Table model, each player has his own set of individual controls. The picture will flip to face you when it is your turn. (When it is not your turn, your set of controls will have **NO** effect on the game.)
3. Your turn lasts until one of your CARS is eliminated. At this point, the game will do one of several things depending on whether or not the eliminated CAR was your last or if you still have others remaining in reserve.

CAR ELIMINATED — OTHERS REMAINING IN RESERVE

- The GAME stops.
- Next, the Rack changes to the Rack number the other player is in, it displays "PLAYER ____ GET READY" while the other player's Rack and CAR appear on the screen.
- Play then begins for the other player.

CAR ELIMINATED — NO OTHERS REMAINING IN RESERVE (SEVERAL DIFFERENT THINGS CAN HAPPEN)

- FIRST PLAYER ELIMINATED:** If your score was one of the TOP 20, the game will go directly to the High Score/Initial mode presentation. When you are finished entering your initials, the words "PLAYER ____ GAME OVER" are displayed **centered** on the monitor screen.

If your score is not high enough to cause the game to go into the High Score/Initial mode, the words "PLAYER ____ GAME OVER" are displayed **centered** on the monitor screen.

Next, the Rack changes to the Rack number the other player is in, it displays "PLAYER ____ GET READY" while the other player's Rack and CAR appear on the screen. Play then begins for the other player.

- LAST PLAYER ELIMINATED:** If your score was one of the TOP 20, the game will go directly to the High Score/Initial mode presentation. When you are finished entering your initials, the words "PLAYER ____ GAME OVER" are displayed **centered** on the monitor screen.

If your score is not high enough to cause the game to go into the High Score/Initial mode, the words "PLAYER ____ GAME OVER" are displayed **centered** on the monitor screen.

Next, it will either go to the Attract mode (if there are no more credits left in its memory) or into the Ready-To-Play mode (if there are still credits left in its memory).
